

Once the user has made the registration in Signal, the application is defaulted to start in inbox:

To add contacts, the user can click on the “more option” icon at the top-right corner and choose the “invite friends” option.

Once the user has chosen the “invite friends” option, the following will appear:

The user can then click on the “CHOOSE CONTACTS” button to enter the friend’s corresponding contact number. Once the user has chosen a friend’s name or number, click on “send sms...” button to send invitation:
